

Connecting to Wireless Services as a Future Student

This method of accessing the wireless network can only be used on the JCC Campus in William Atkinson Hall and James McDivitt Hall. This wireless network may be used by any person, but users will only be able to connect to the JCC and FAFSA websites.

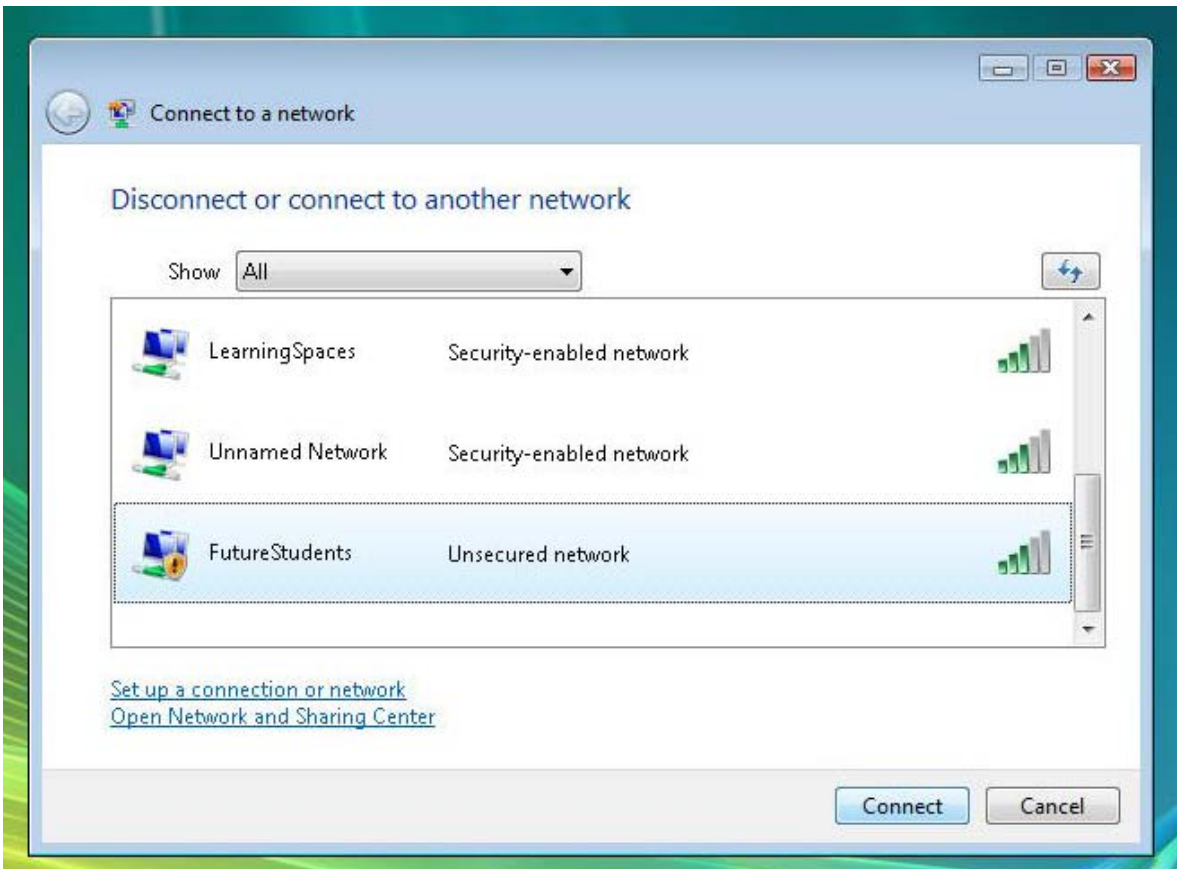

1. Go to Start > Control Panel. Select Classic View.
2. Double-click Network and Sharing Center.

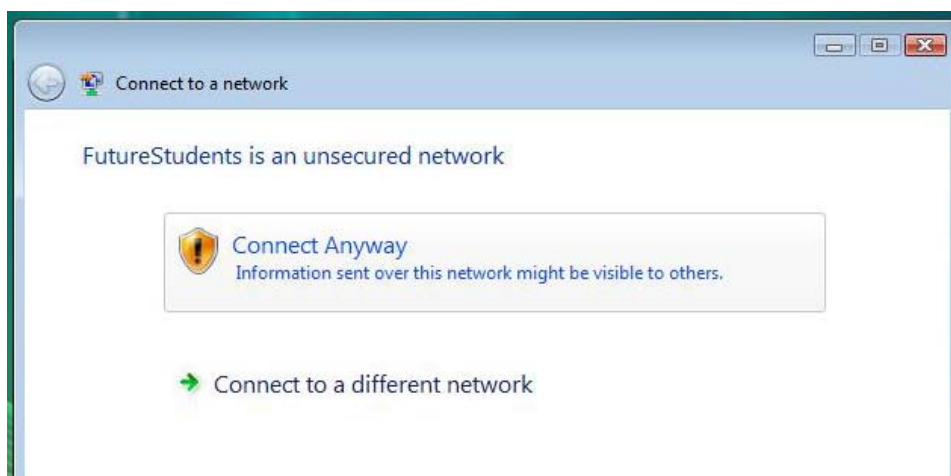

3. On the Tasks panel, click on the “Connect to a network” link.

4. Select FutureStudents and then click Connect.

5. A warning will be displayed, asking if you want to connect to the unsecured network. Select Connect Anyway.

6. When the computer connects to the FutureStudents wireless network, it will display a message verifying that it has successfully connected to that network. Click on the "Close" button to exit this message.
