

Operating Instructions for BW 206

Powering UP

In order to use the projection system effectively, you must first power everything up. There are a few key components that must be turned on.

- **Main Power:** To turn the Projector on you must use the projector's remote and click on the power button (The remote should be in the locked instructional cabinet).
Note: When using the projector remote make sure you point to the front of the projector, or the projector might not respond accordingly.

- **Computer:** ♦ Turn the computer on by pushing the power button.

- ♦ If you have your presentation saved on a zip disk, floppy, or CD-ROM, you can bring it in to the presentation room and put it into the computer located in the cabinet.

Wireless Keyboard and Mouse:

- ♦ The multimedia rooms not only have a regular keyboard and mouse, but they also have a cordless mouse and keyboard if needed (Figure A). After using this mouse, please place it back in the charger (Figure B).

Figure A

Figure B

Note: The reception for the cordless mouse is to the right of the keyboard (Reception Device shown below).

Information you should know about these wireless devices:

- ◆ The Wireless keyboards and mice have a manufacture stated range of 100 feet.
- ◆ There are several of these wireless devices in the buildings, and the system has been programmed to minimize conflict between the apparatuses.
- ◆ If you have difficulty using the wireless keyboards and mice, there may be crosstalk between the similar wireless devices in that building. Please use the normal keyboard and mouse at this time.

Closing Down

When you are finished with the presentation room, please check to make sure that all of the following are turned off.

Toby Montgomery
Multimedia Room
10/16/2006

- The Projector: To turn the projector off you must **push Power twice** or the projector will still be on after pushing Power only one time.
- The Computer: Power Button.
- The Sound System: Push “STANDBY/POWER button.
- Place the cordless mouse back in its charger.
