

Arts & Communications Pathway

Visual Communication/Multimedia and Web Design Associate in Applied Science

Visual Communication encompasses the existing Graphic Design program and the Multimedia and Web Design program, which was adopted in Fall 2000. Art, multimedia, animation, layout and design are some of the areas covered in these programs.

Employment opportunities in Visual Communication include: design for printed media, such as books, magazines, brochures, posters, newspapers, information graphics; and the creation of symbols and corporate identification devices. The profession also includes packaging, point-of-purchase displays, product graphics and environmental graphic design, as well as animation, computer-based multimedia, interface and interactive design.

Students should prefer activities concerned with communicating ideas to people, activities that require creative imagination and activities that provide satisfaction from seeing your work in print or published on the internet.
