SCCM 2012 FAQ – How to install applications that have been advertised to your computer

Step One:

- 1. Go to your **Start menu**.
- 2. Type **Software Center** in the search menu in the top right corner, click on the icon to open the application.

Step Two:

- 1. Now that your Software Center is open you will see any advertisements that have been sent to your computer. To install an application that has been published to your machine **select the application**.
- 2. Then hit **Install**.

Step Four:

1. Depending on the software you are installing a pop-up may appear during the download. These windows will disappear once it has completed the download.

Step Five:

- 1. Once your installation is complete your Installation Status will change to **Installed**.
- 2. You can also manage any Installed Software that has been pushed to your machine by going to the **Installed Software** tab.
