# Wireless FAQs for Windows7

Step One:

1. Open **Connect to a Network** by clicking the network icon (📶 or 🖥) in the notification area.

2. Click on **JC-WiFi**, make sure you have the box checked to **Connect automatically**, and select **Connect**.

Step Two:

1. A Windows Security Window will appear, asking for **Network Authentication,** enter your **User name** and **Password** and click **OK.**

Step Three:

1. After you have successfully entered your User Credentials a window will appear with a **Windows Security Alert**. The message will state that, **The connection attempt could not be completed,** followed by two options **Terminate** or **Connect.** There will also be a drop down arrow to show more **Details**; in the details drop down menu, it provides validity of the certificate**.** By selecting connect you are approving use of this certificate. By selecting **Terminate** you are disapproving use of the network connection.

2. Select **Connect.**

Step Four:

1. You have now successfully **connected** to the **JC-WiFi** network.
