Policy Summary:
In accordance with Jackson College’s duty to provide and maintain a learning environment that is free of known hazards, we are adopting this policy to safeguard the health of our students, employees, contracted employees, and their families; our visitors; and the community at large from infectious diseases, such as but not limited to COVID-19 or influenza, that may be reduced by vaccinations.

This policy will comply with all applicable laws and is based on guidance from the Centers for Disease Control and Prevention and local health authorities, as applicable.

Policy Scope:
This policy applies to all Jackson College students completing in person activities on our campuses, engaging in Jackson College athletic events, and engaging in off campus Jackson College sponsored events, during a communicable disease outbreak ([https://www.cdc.gov/outbreaks/index.html](https://www.cdc.gov/outbreaks/index.html)) or active Jackson College Pandemic Alert level.

All students completing in person activities offices on our campuses including housing, in person classes, athletics, or student employment are encouraged to receive vaccinations as determined by Leadership Council, Reintegration Task Force and human resources.

Policy Statement:
Jackson College will provide onsite access to the vaccines and/or a list of locations to assist students in receiving vaccination.
  * Vaccinations should be run through students’ health insurance where applicable.
