

## Step One: Select JC Wi-Fi

1. **Connect to the network** - You can connect by locating the Wi-Fi symbol in bottom right corner of the page shown in the image below.

2. Click on **“Not Connected”** shown underneath the **Wi-Fi symbol**, from here Wi-Fi networks will appear.
3. Select **JC-Wi-Fi**.

## Step Two: Insert Information.

1. After selecting JC-WiFi, the image on the right should now be on your desktop. From here you will change options and input information
2. **Change** the connection options to match what is shown on the right. See below for the changes needed in this step.

EAP Method    ▷    PEAP

EAP Phase 2 Authentication    ▷    MSCHAMPv2

Server CA Certificate    ▷    Do Not Check

3. Input your JC username under the **identity tab**, include the JC domain. If you're a student, your username will end with (**@my.jccmi.edu**), and for employees (**@jccmi.edu**).
4. Input your JC password under the Password tab.

Join Wi-Fi network

Domain suffix match

Identity

EvanstoJaneA@my.jccmi.edu

Password

Je04701566 Hide password

Anonymous Identity

Save identity and password

Cancel Connect

5. Finally, click the blue connect found in the bottom right of the tab.

**Don't know you JC username and password?**

You can find more information on username and password structure regarding your default information at:
