

## **Leadership Council Prior Meeting Review**

### **12.1.21**

The Leadership Team met with Dr. Wayne Rose regarding updates on IT and cyber security. Beginning next week, the LC prototype of email banners, indicating outside email sources, will be messaged to employees next Monday, and activated on Tuesday.

The group considered the question of “How Jackson College could encourage students to engage in help-seeking behaviors without their shying away from the help, due to stigma?”

The group also discussed a way to assist students during the coming holidays, particularly around providing students with food. The team discussed strategies for making Jackson College a “Hunger-Free Campus” in early 2022. The Council also discussed providing a small financial gift to all employees for purchasing food for the holidays.

The Council approved two new positions: 1) Development Officer; and Grant Writer & Proposal Specialist.

The group also discussed updates to the College’s Vaccination Policy in light of new information regarding Omicron and booster shots – this will be reviewed again at next week’s Leadership Council.

The date change for the AFIT Summer Institute in 2022 was also noted.
