Catalog Description and Pre- and Co-requisites (Same as taxonomy and catalog)

Emphasizes simplifying expressions, solving equations, and graphing functions, including linear, quadratic, polynomial, rational, radical, exponential, and logarithmic. Problem solving and mathematical modelign are integrated throughout. Appropriate technology includes a graphing calculator. The mathematics department recommends that the prerequisite not be more than two years old. If the prerequisite is more than two years old, then the recommendation is that the course placement exam be taken or the prerequisite be retaken to ensure the success of the student.

Prerequisite: MAT 031, with 2.0 minimum, within 2 years

Knowledge, Skills and Abilities Students Acquire from this Course (Educational Objectives)

1. Simplify Algebraic expressions involving polynomial, rational, radical, exponential, and logarithmic functions.
2. Solve equations, inequalities, and systems of equations and inequalities.
3. For functions described algebraically or graphically:
   a. evaluate, find domain and range, find inverse
   b. perform algebraic operations and graphical translations
4. Solve application problems, including the ability to:
   a. represent a situation using a graph, table or equation
   b. forecast outcomes from above representations
   c. solve optimization problems
5. Use appropriate technology as part of their completing the objectives above.
6. Demonstrate a knowledge of current technology and/or scientific issues.

Associate Degree Outcomes Addressed in this Course (These must appear in course syllabus.)

- ADO 3: Demonstrate computational skills and mathematical reasoning
- ADO 7: Critical Thinking and Problem Solving

Units/topics of Instruction
See course description and educational objectives.

Instructional Techniques and Procedures
Although techniques vary from instructor to instructor, this course usually consists of mostly lecture and group work.

Instructional Use of Computer or Other Technology
A graphing calculator is used extensively in this course. The instructor may choose to incorporate the use of MyMathLab in homework, quiz and test assignments. Also, the instructor may choose to incorporate the use of EXCEL in solving various application problems.

Instructional Materials and Costs to Students
The instructional material for this course may vary by instructor but can include a textbook, MyMathLab, or both. The graphing calculator must be bought by all students.
Skills and abilities students should bring to the course
