

SCCM 2012 FAQ – How to install applications that have been advertised to your computer

Step One:

1. Go to your **Start menu**.
2. Type **Software Center** in the search menu in the bottom left corner, click on the icon to open the application.

Step Two:

1. Now that your Software Center is open you will see any advertisements that have been sent to your computer. To install an application that has been published to your machine **select the application**.
2. Then hit **Install**.

Step Four:

1. Depending on the software you are installing a pop-up may appear during the download. These windows will disappear once it has completed the download.

Step Five:

1. If the application has not installed the status will show as **Failed**. Retrying the installation is an option.
2. Once your installation is complete you can view it and you can also manage any Installed Software that has been pushed to your machine by going to the **Installed Software** tab.
